Hongkong, 27th December 1904. Dear Sir, -In reply to your letter of 24th December, I have to inform you that competing clubs may bring their own boats only providing that they are clinker built, as I understand yours are? For Clubs that fined it inconvenient to bring their own, boats will be provided in Hongkong. Yours faithfully,

(Signed) E. R. HALL! FAX, Hon. Sec., H. K. Regatta.

This letter was received in reply to an i enquiry from Canton as to the class of bonts to be used for the Hongkong Regutta (Hongkong Challenga Cup). .

CANTON, February 24, 1910. FRANK LAMMIET Esq.,

The Hon. Secretary, The Hongkong Regatta, Hongkong. Dear Sir,-I beg to acknowledge your

letter of 21st inst. with reference to the conditions under which your comittee propose that the Hengkong Challenge Cup shall henceforth be rowed.

The position my committee adopt in this matter is as follows. On one occasion when the Canton Row-

THE SEVENTH ORDINARY ing Club competed for this cup, enquiry and Consulting Committee and to elect a on February 21, 1905, it was suggested 1961 by the Hon. Secretary of the Hongkong The TRANSFER BOOKS of the Come Boat Club, that a certain design of boat peny will be CLOSED from 1st Mayeb to

competed for the Challenge Cup. Last year, at which time we were holders of the Cup, when the hest question was raised, my committee deemed it advisable ANNUAL MEETING of SHARE- to ascertain the exact conditions under which the race was held, and a copy of the rules was asked for on March 15, 1909. No answer to this request was vouchsafed and nothing further supervened until the issue of this year of the Hongkong Regatta Programme, when it was observed that it 1909. Declaring a I ividend and electing a was stipulated that all four our races had to be rowed in the Cruickshank type of

It is noted, however, that in the Rules governing the race, Rule 3 states, that the boats used must be "similar in typeand construction." In this connexion I must draw your attention to the fact that at the first regatta, when the Canton Rowing Club competed for this cup, all the boats used were similar in type and design, and that the first departure from the design was made by the Hongkong Clubs in introducing first the Leux and subsequently the Cruickshank type, and the spirit of the original rules will be more faithfully observed by a reversion on your part to the Clasper, type than by the adoption of the Hongkong Clubs of the Cruickshank type. On the other hand, my Committee would point out that the phrase used in Rule 3 is similar and not identical, and they maintain that the boats used by the Canton Rowing Club are in fact similar in type and in construction to the Cruickshank boats, though not identical, and that the Canton Rowing Club, the holders of the Cup which they have wen on more than one occasion in boats of the Chaper type (a type introduced at the suggestion of the Hongkong Boat Club and specifically allowed by previous Regatta Committees), are in their own boats.

As time is very pressing I have taken

KOWLOON-CANTON RAILWAY.

We seem at last to be arriving at something like finality in the estimated section will be ready for opencost of the British section of the Kowloon-Canton Railway. The first report the essentials are ready, with the drawn up by Mr E. S. Lindsey, the above, in order to work up the local newly appointed Chief Resident traffic and to transport material for Engineer (lent for two years by the Indian Railways) was presented to the It is impossible to fix a date at present meeting of the Hongkong Legislative Councilon Thursday, and it puts us in rolling stock to be ready so that it. possession of figures which seem to in- earlier than July." clude everything that should be rightly included, so that the public can now get satisfactory, though it would be idle more or less accurate idea of how folly to blind our eyes to the fact that much the little bit of railway running with the completion of the railway we through British territory to the Chinese shall, only be at the beginning of our frontier is likely to cost the Colony. It is an old tale now how, the original experiences of the Nanking-Shanghai estimate of \$8,003;642.63 drawn up in railway in the Titanic struggle with June, 1907 has expanded gradually by the tekin system of China count for odd millionsa year till the present round anything. sum has been reached. As Sir FREDERICK LUGARD explained, for about the fifth time, the original estimate did not include the cost of workshops, rolling stock, nor interest on capital, or loss by exchange. Indeed, in December, 1909, some of these items were still seem to have proved any deterrent to the A. F. Arcuili missing, so it is not surprising that the figures then presented, \$9,617.499.22, have again expanded till at last we have robbery took place, the victims this time Wendt and Co. as a final estimate-to-date the imposing \$12,371,495.46. Railway estimates, like a ball of snow rolling ! down a hill-side, invariably increase so the public of Hongkong, all things ringing of the bell called the house-boy to considered, ought perhaps to be thankful that the bill is not going to be larger than present indications disclose. We must not forget that apart from the exceptional difficulties met with

CHINESE STUDENTS AT OXFORD.

The New Facilities.

Mr H." T. Gerrans, Secretary of the Local Examination Offices, Oxford, has sent the following letter to Mr T. K. Dealy,

Queen's College :-Dear Sir, - The activity of the English and Americans in educational matters in China has been for some time engaging the attention of political writers in Germany. Quite recently I read an important article in one of the chief. German Monthly Reviews on the whole question, and I found that special note was taken of the proceedings in the matters of the proposed Univer-

ity at Hongkong. It was I who moved the University of Oxford to make the change in its Statutes, which led to the acceptance of Classical Chinese and English as substitutes for Latin Both Dative Unfliese and Linglishmen

It-has-occurred to me that the new age become better known amongst educated natives and that they might be interested in learning how much time might be saved if they were enabled to pass an Examination in China which freed them from a Preliminary Examination at Oxford and thus enabled them to proceed without interruption to prosecute their studies here, should they ultimately decide to come.

Among the considerations which were laid before me by those who induced me to move the University was one of considerable importance. It was pointed out that under the arrangements which previously existed a student who desired to come to Unford was obliged to spend some time in this country in preparing for his initial Examination.

As to any action which it may be thought desirable to take in Hongkong or in any of the neighbouring parts of China, those who are resident on the spot can alone

THE ADMINISTRATION ACTION.

The Revealing of Public Documents.

The administration action which has been eccupying the attention of the Supreme Court since January 4, and which involves a wum of from \$30,000 to \$1,000,000, was contiqued before Mr W. Rees Davies, Acting Chief Justice, at the Supreme Court to-day. The plaintiff is Li Chuk Hung, who, as administrator, sought to obtain from Li-Pui Choi an account of the monies belonging to the estate of Li Kin Chei, deceased, which had been used by defendant in his business, and an account of the profits which had been made with the said monies. Plaintiff further claimed payment by defendant to plaintiff of such an amount as might be found to be due on taking such accounts. Sir Henry Berkeley, K. C., the Hon. Dr Ho Kni, and Mr. Eldon Potter, instructed | Susion Paras - Distance I mile. by Mr P. W. Goldring and Mr Leo D'Almala e Castro, were for plaintiff, while defendant was represented by Mr M. W. Slade, K.C., and Mr C. G. Alabaster,

instructed by Mr Holborrow. Sir Honry Berkeley said that a question had arisen as to the right of the plaintiff to have certain avidence given by a public officer in that action with regard to state ments made to him in his official capacity The claim of privilege had been taken and they had been informed of that fact. They had also been informed that the offictaking the objection had been advised by the head of the department and that he would have his objection supported in argument by the Attorney General.

Hon. Mr F. A. Hazuland-I cannot claim the right to address the court ; I am

simply here watching the case. I advised Mr Clementi to object to it.

The Chief Justice—There are cases that where a government officer objects to the production of a document on the ground that it is opposed to public interest the judge will not order its production. Continuing, Sir Henry Berkeley said that the statement of claim alleged that defendant's grandfather was a partner of the firm and the defence stated that the said individual never was a partner in the firm. he was a partner or not. He was calling Mr Clementi, who was at one time in the evidence as to statements made to him by the defendant on an application by the defendant to be naturalized as a British subject, which would support the allegation in the statement of claim and negative the Bow-Sub.-Lt. M. Williamson-Napier 11. contrary allegation in the statement of defence. It was claimed by the Colonial Secretary that the statements whenever Stroke-Rev. H. S. The Chief Justice -The Colonial Secret any informed the Registrar of the Court to communicate with meand I directed him to reply that Mr Clementi should appear in Court and then he could take the objection.
Sir Henry Berkeley, said that he was prepared to argue the point upon principle with regard to the particular evidence which they wished to give. The starements were given in a private matter affecting the applicant only. The rule of law under which this privilege can be claimed only applied to communications of a public nature, or the communications of a semiprivate nature which affects the public service, and in order to sustain the plea of Crew. privilege it must be shown to the court limb the disclosure of the statements discred to be given in evidence would be injurious to the public service. If the court held the objection as facile and order the production of the evidence desired. It was of the first important that the truth should

come out in a Court of Justice. ' Mr Slade interrupted and the Chief Justice said he was sorry but he could not hear him. There were numerous authorities to that effect. Mr.Slade-I beg your lordship's pardon,

you can hear a crossing sweeper if you wish. counsel in the case cannot be heard on this particular point.

Practice to Cease in Hongkong. An interesting discussion took place at

the Legislative Council yesterday afternoon respecting the method of taking the oath. The Acting Attorney General (Mr F. A. Hazeland), in moving the second reading of an Ordinance to regulate the Law as to Oaths, said :- This Bill introduces the whole of the Oaths Act, 1909, and section the Oaths Act, 1888, is the section which allows a witness to take the Scotch form of onth should be so desire. The Act of 1909 does away with the kissing of the Bible. There has always been a great outcry against this practice by a large number of people, notably doctors, having regard to

THE WORLD'S GOLD OUTPUT

The world's output of gold for [the pub year has been estimated by a writer in the monthly circular of the National City Bank of New York at not lessthan \$450,000,000. The total for 1908 was \$134,000,000. The writer believes that, if the present rate o Increase continues three years longer, the total in 1912 will exceed \$500,000,000 He goes further in saying there is every reason to expect that this incresse will continue Vilor several years to come," The mines of the Rand, for example, are estimated to contain sufficient quantities of gold to keep up their large contribution for "at least a quarter of a century." There is no indication of any decline in South African fields, where the conditions at present indicate increases rather than the contrary. South African mines are not subject to heat conditions which in many other mines impose a limit as to the depth at which they can be successfully worked. Physical conditions with them are such as to admit of successful operations to great depths, thus prolonging the period of their productivity. The writer adds that, taking the world as a 155 whole, "the outlook for a large and continuous production of gold is exceedingly favourable."

He presents some startling statistics as to gold production since the discovery of America. From 1492 until 1880 (a few years less than four conturies) the world's production is estimated to have been period of twenty-seven years, the production is estimated at almost as large a sum, namely, \$6,020,925,000. The writer aids that popular impressions as to the uses to about forty-five per cont. The remainder is employed in the arts and in hoarding. the principal countries of Europe "have adopted measures to consorve as well as incresse their holdings."

The Japaneso traveller, Mr Kawaguchi, who has published a book on Tibet, is now devoting himself to completing a long Central Hindu College, Benares, where he has been already a considerable time as student

A Pageant of South African history is to be held at the foot of Table Mountain in connection with the opening of the Union Parliament in South Africa' by the Prince of Wales in October. Mr Frank Lascelles, who is producing the Pageant of London, this summer, is to take charge.

The following note was published in the New York Times regarding a shipment of silk forwarded per the O.S.K. s.s. Tacoma Maru from Yokohama on the 1st January :- 4 A consignment of silk which arrived at Tacama a week ago Sunday was sent East over the Chicago, Milold St. Paul Line to Chicago and thence to New York, arriving in Jersey City in2 hours less than 5 days. Hongkong Tides.

Hongkong Sub. Coin....

The tide table given below has been compiled at the Nautical Almanae Office In London from the result of the analysis | able to look forward with pleasure to bedof observations taken by means of an au | time for I know that a good night's sleep tomatic tide-recording machine in the Water Police Basin at Taim Sha Tsul during the years 1887-8-9. The zero of the table corresponds with the zero of the soundings in the Admiralty

Charts which has been found to be 4 feet 3 inches below mean sea level. To obtain the depth of water on the tid gauge at the Victoria Naval Yard add 3 twitching was caused by an atrophied feet 4 inches, and on the gauge at Lamont nerve in the arm. Af cr I had been using Dock, Aberdeen, add 10 feet 6 Inches to Dr Williams' Pink Pills for some time my the height given in the table.
